Cockroach Treatment (Bait and/or Pesticide)
Client Preparation

Your Greenshield Pest Control technician will require the following preparation steps to be completed prior to their arrival to ensure a safe and effective treatment. Failure to comply with pre and post preparation steps may result in a void warranty.

Pre-Treatment Instructions

Interior
- All people and pets must vacate the unit during service for a minimum of 4 hours post-treatment if liquid pesticides are used
- Infants, children under two, pregnant individuals and individuals with underlying health conditions such as heart, kidney, respiratory ailments or allergies must not re-enter for a minimum of 24 hours post-treatment. Consult a physician for any further re-entry requirements.
- Fish tanks/terrariums are to be covered with plastic/sheet/towel prior to treatment if liquid pesticides are used
- Do not apply store bought pesticides. Greenshield is required to wait 10 days prior to applying additional pesticides
- Remove items away from baseboards at least 10"
- Thoroughly vacuum/sweep floors prior to treatment
- Clean up all food waste (garbage, dishwashers, spilled food behind appliances, food spilled in cupboards)
- Clean off top of fridge and stove so that the technician can pull them out
- Disconnect and pull out dishwasher prior to arrival

Post-Treatment Instructions

Interior

- **NOTE MORE COCKROACHES MAY BE SEEN POST TREATMENT – THIS MEANS IT IS WORKIN GAND THEY ARE TAKING THE BAIT**
- **PLEASE AVOID SPRAYING COCKROACHES AFTER TREATMENT**
- Ventilate areas by opening windows for at least 20 minutes following re-entry
- Avoid mopping 6" away from baseboards for 30 days post-treatment
- Avoid the use of store bought, home-made or natural pesticides (diatomaceous earth, borax)
- Continue to eliminate any potential food sources. Failure to do so will draw them away from bait sources.
- Reduce harborage areas by performing any sealing/caulking recommended by your Greenshield technician
- Reduce harborage areas by eliminating clutter
